Part 4:Exterior material settings

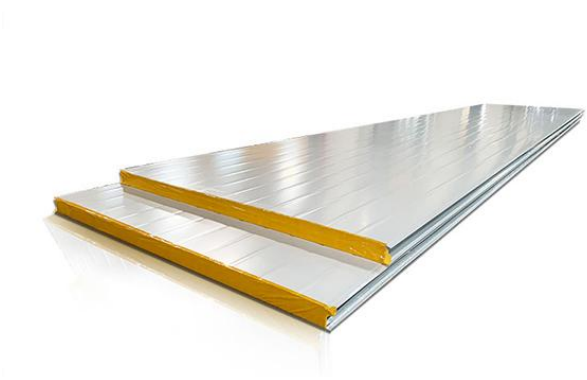

Metal carved board

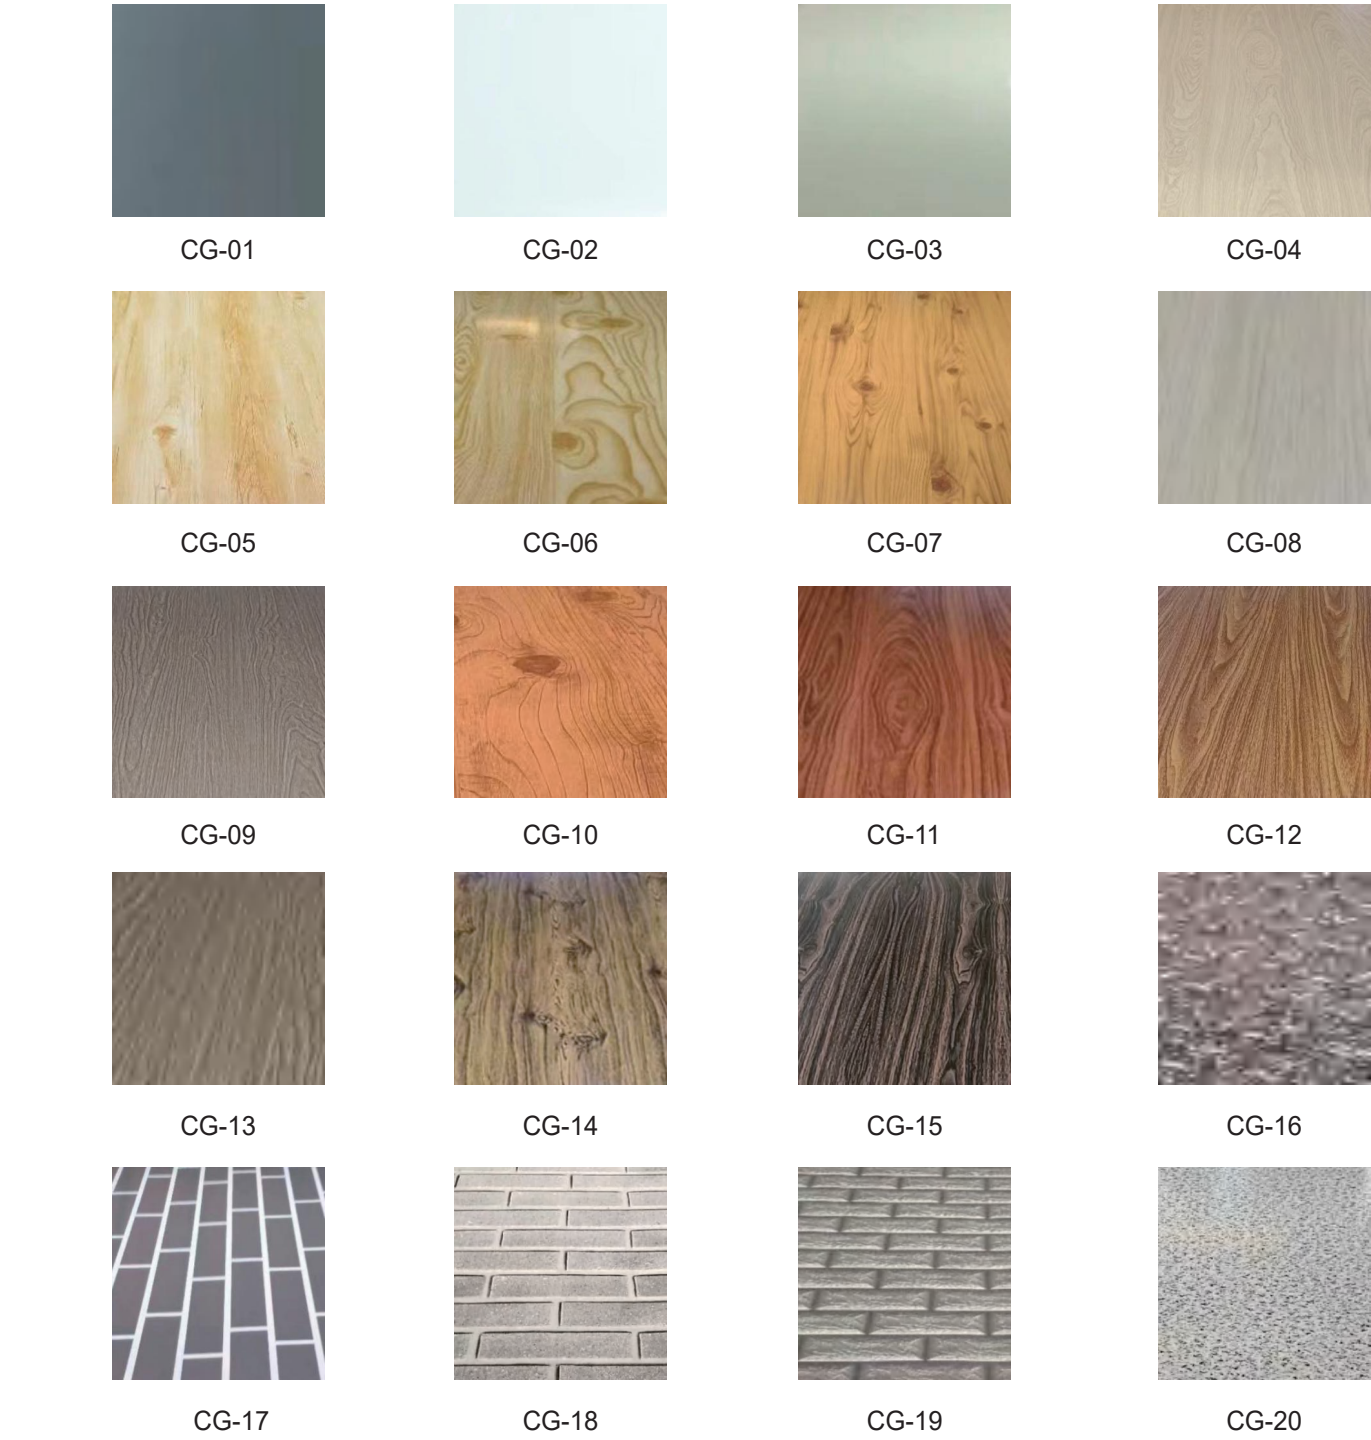

**Highly decorative:** metal carved panels can present a variety of exquisite patterns and patterns through fine carving techniques.  
**Easy to maintain:** The surface of metal carved panels is generally specially treated to have good anti-rust and anti-corrosion capabilities.

Colored steel plate

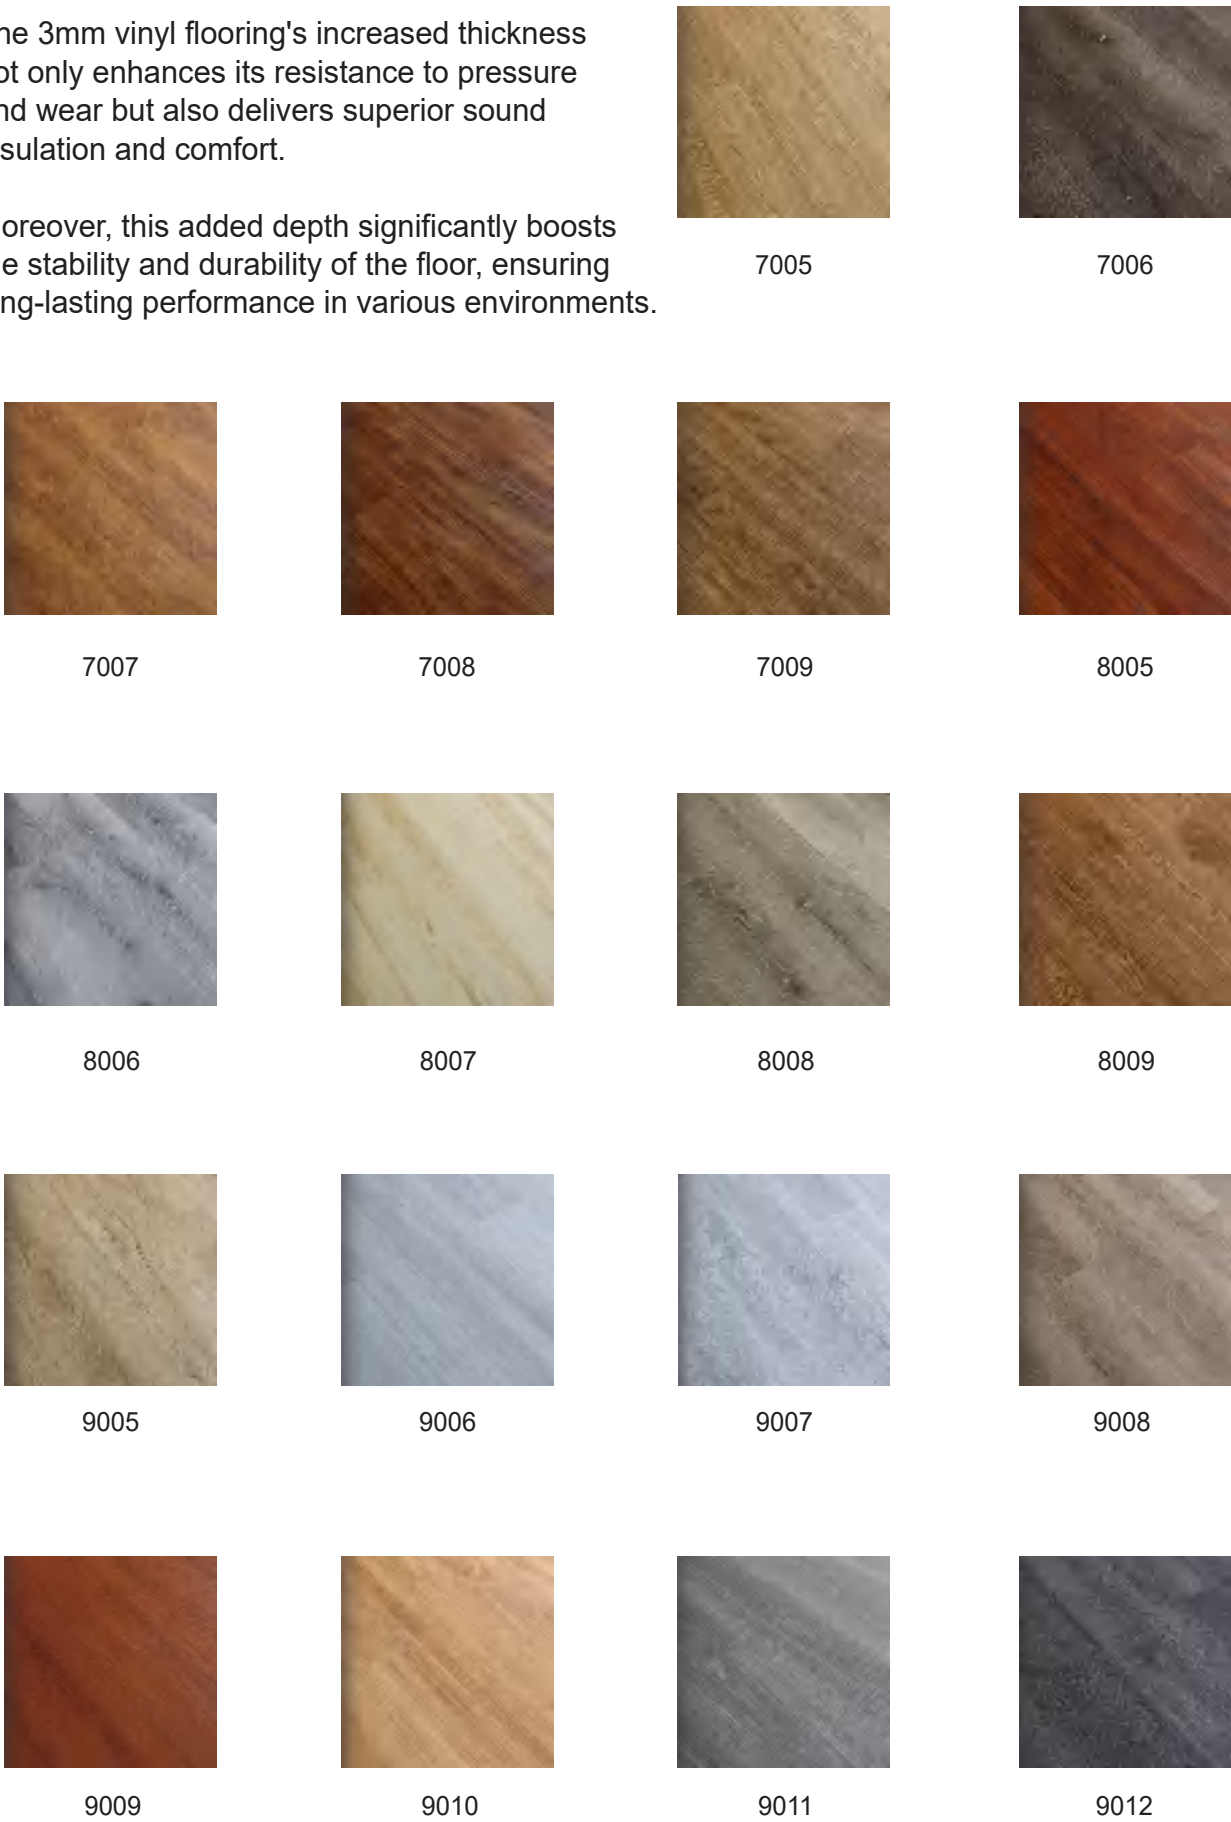

**Durability:** steel sheets used in color-coated steel panels for container homes provide exceptional strength and resistance to corrosion, ensuring longevity and minimal maintenance.  
**Versatility:** color-coated steel panels offer a wide range of colors and finishes, allowing for customization and aesthetic flexibility in designing container homes to blend seamlessly with various surroundings.

Vinyl floor 3mm

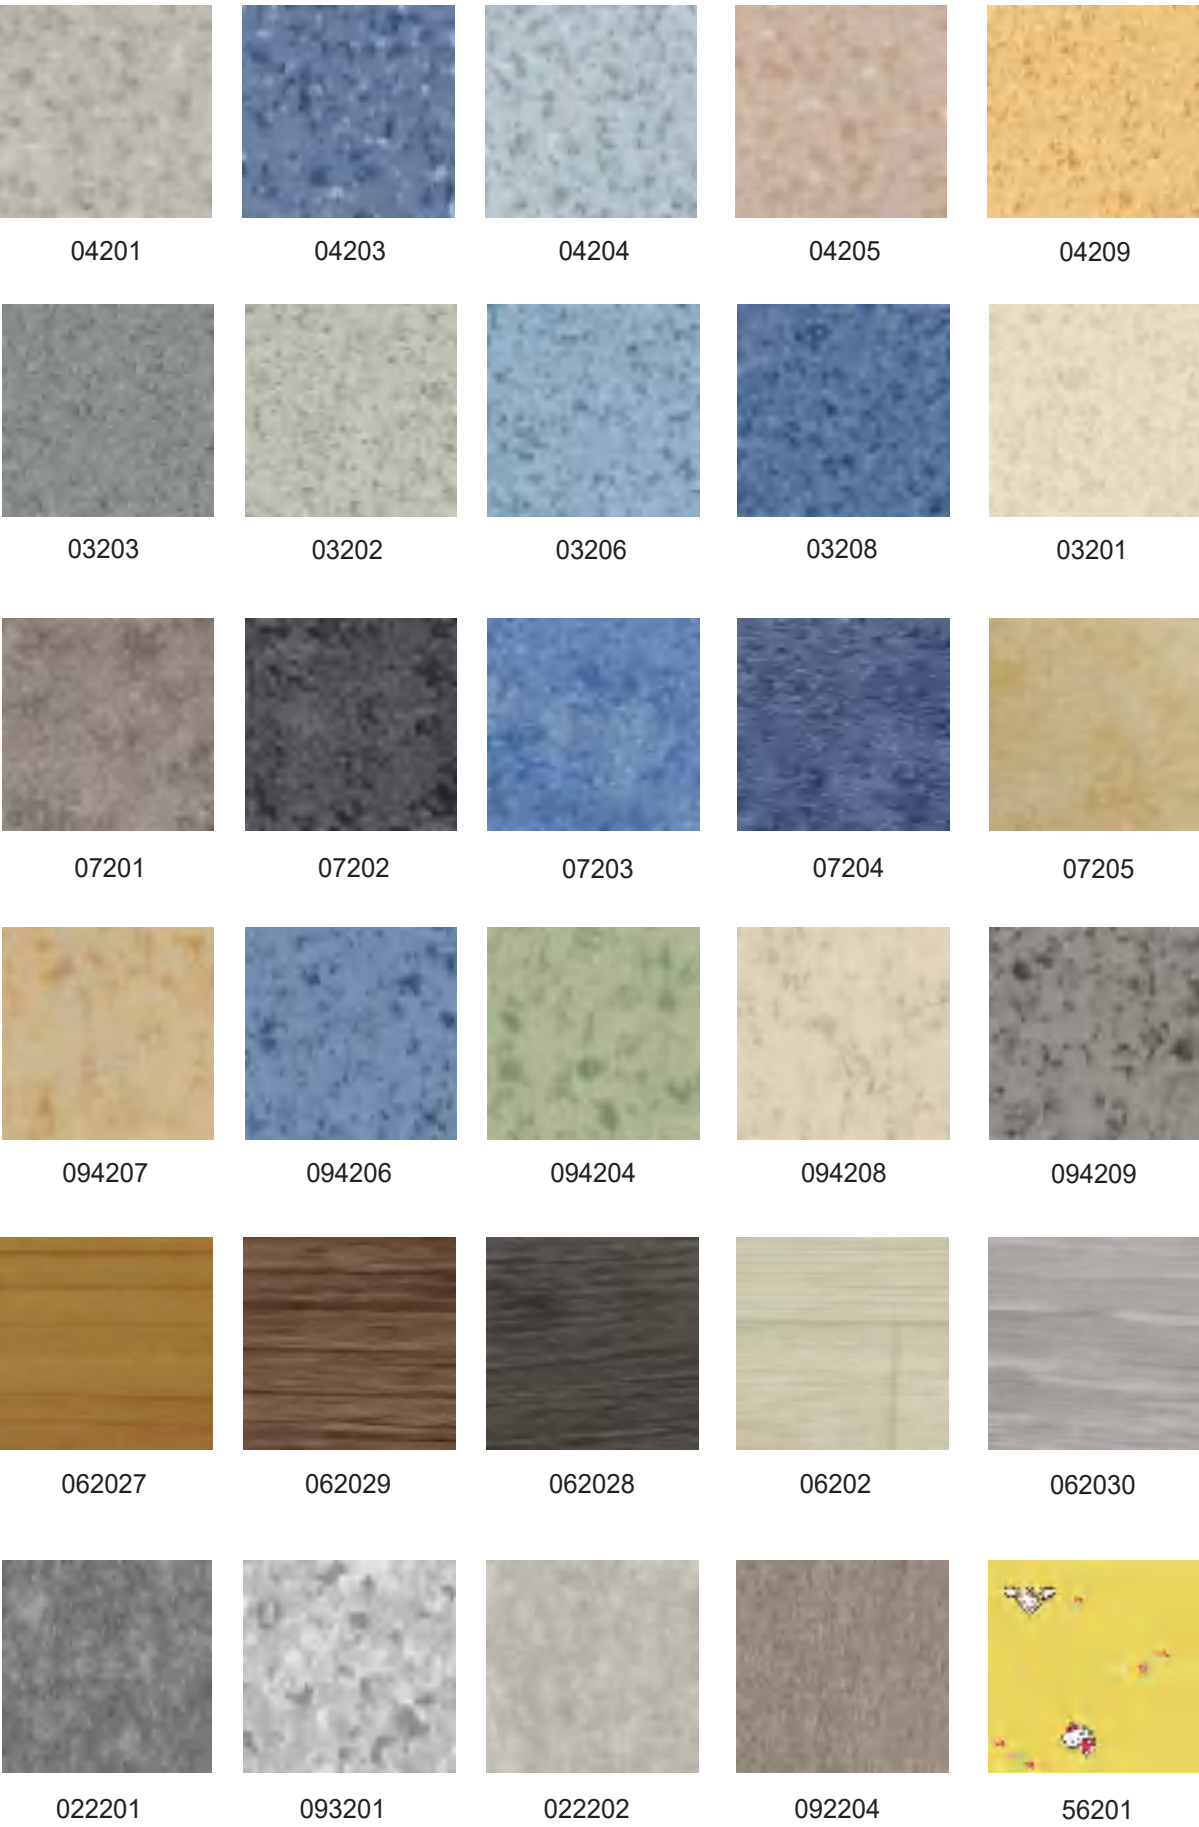

The 3mm vinyl flooring's increased thickness not only enhances its resistance to pressure and wear but also delivers superior sound insulation and comfort.

Moreover, this added depth significantly boosts the stability and durability of the floor, ensuring long-lasting performance in various environments.

PVC floor 2mm

PVC floor 2mm is usually thin, but it has the characteristics of good flexibility and easy installation. It is suitable for light commercial places or home use.

## Part 6:Windows Settings

PVC window has excellent thermal insulation and waterproof properties, are easy to clean and maintain, and are relatively cheap.

### PVC window

Broken Bridge Aluminum Window is designed with broken bridge aluminum material, which has excellent thermal insulation performance and wind pressure resistance. It is also sturdy and durable and can effectively isolate the indoor and outdoor temperature difference, improving the energy saving and comfort of the building.

### Broken bridge aluminum window

Aluminum alloy windows have the characteristics of light weight, high strength, and good corrosion resistance. They are suitable for the design of large-span windows, can achieve a larger opening area, provide better lighting effects, and are modern and beautiful at the same time.

### Aluminium alloy window

## Part 7:Entrance door settings

KFC shop style front door is a door with distinctive brand characteristics, usually made of glass, metal and other materials. It has a simple and elegant appearance while having good durability and safety.

### KFC shop style front door

Broken bridge aluminum door is made of broken bridge aluminum material, which has excellent heat insulation and thermal insulation properties. It can effectively prevent the exchange of hot and cold air, improve indoor comfort, and has good anti-theft performance and durability.

### Broken bridge aluminum door

Titanium magnesium alloy sliding door is made of titanium magnesium alloy, which has the advantages of light weight, high strength, corrosion resistance, wear resistance, smooth sliding and not easy to deform.

### Titanium magnesium alloy sliding door

## Part 8:Lamp shape selection
